	質問(英文)	EPC has asked if HTO recommends installing grease fittings for explication of high temperature grease to SCV camehat bushings foliase bushings) XEPU will have brief maintenance ourage this coming weekend and if we make such recommendation then EPC would like some details so that they can perform such work on this weekend. I have given a preliminary votal reply that we will likely addise against using grease in the ciless bushings but that we will consult with T-Pukei. Please send your comments to me through TSA Answer Center and also by fax or -mail life to the property of the proper

	回答(英文)	We would like to reply as below. 1) The camehaft bushing is oil-less bushing No.500.E not used for this bushing type. HTC does not have such an experience as what EP-20ur recommendation is that to conduct hot check immediately after stopping the turbine. The hot check means to conducted to confirm that servo-motor can move smoothly to both open and of Please pay a special attention when the servo-moto Best Regards,	C intends to d C SCV and close directions	o . s.
